

# Malaysian Fisheries Society

## Seminar 2017

### New paradigms for Aquaculture in Malaysia

May 20, 2017

Agriculture Hall, Faculty of Agriculture, UPM Serdang, Selangor

## Introduction

In 2014, aquaculture supply of fish for human consumption surpassed that from capture fisheries for the first time. Aquaculture not only provides a food source for human health and well being, it is a source of livelihood and contributes to Malaysia's GDP. The aim of this seminar organised by the Malaysian Fisheries Society is to discuss opportunities and new paradigms for aquaculture development. It will look at the current information in applied and basic research for aquaculture development. The speakers for this seminar have been selected specifically to address innovations, practical farming models and research for future development. This seminar will provide a platform for interaction among researchers, farmers, entrepreneurs to discuss the prospects for expansion and feasibility of some ideas for aquaculture. Topics include biosecurity, feeds & nutrition, disease control and technology in aquaculture. This seminar will be held in conjunction with the Annual General Meeting of the Malaysian Fisheries Society.

## Tentative of Seminar

8.00 – 8.45 am	Registration
8.45 – 9.00	Welcome Remarks
9.00 – 9.40	Dr. Mazuki Hashim (Department of Fisheries) Biosecurity
9.40 – 10.10	Franck Ducharne (CEO, Entofood Sdn. Bhd) Insect Meal
10.10 – 10.30	Refreshment
10.30 – 11.00	Best MFS Student Award 2016
